DETAILED ACTION

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claims 1 and 3 are rejected under 35 U.S.C. 103(a) as being unpatentable over Chong et al (WO 9921845; 5/6/99). Chong teaches the compound 1-methyl-4-nitro-phenyl)-piperazine whereas instant invention teaches its homolog 1-(1-methylethyl)-4-(4-nitrophenyl)piperazine. See page 58. Chong teaches the compound 4-(4-methyl-piperazin-1-yl)-aniline whereas instant invention teaches its homolog 4-[4-(1-methylethyl)-1-piperazinyl]benzenamine. See page 58. Chong teaches the compound 1-(4-isothiocyanato-phenyl)-4-methyl-piperazine whereas instant invention teaches its homolog 4-(2-hydroxyethyl)-1-(4-isothiocyanatophenyl) piperazine. See page 59. It would have been obvious to one having ordinary skill in the art to make the instant homologs. One would have been motivated to do this since homologs are structurally similar to the prior art compounds in terms of size, polarity, and electronegativity. These similar structural features of the prior art compounds and the instant compounds would result in both the prior art and instant invention compounds having similar physical and chemical properties, which in turn would render both groups of compounds having similar activity.

Art Unit: 1616

Claim Objection

Claim 2 is objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims. The prior art does not teach or suggest the instant compound 1-(4-isothiocyanatophenyl)-4-methylethyl)piperazine.
